

THODETI VARSHITHKUMAR

B.Tech CSE (AI & ML) Student | Python & AI Chatbot Project | Fresher

+91-7013669108 | thodetivarshith36@gmail.com | Telangana, India | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Motivated B.Tech CSE (AI & ML) student at Noida International University seeking an internship or fresher opportunity in Python development, AI-assisted applications, or software development. Built a Flask-based AI career guidance chatbot with Gemini API and SQLite, and actively improving practical coding, OOP, database handling, and GitHub workflow skills.

EDUCATION

Qualification	Institution	Score	Status / Year
B.Tech CSE (AI & ML)	Noida International University	CGPA: 8.22/10 up to 3rd Semester	Pursuing
Intermediate	SR Junior College	Marks: 933	Completed
SSC / 10th	Maathrusri High School	GPA: 8.8/10	Completed

TECHNICAL SKILLS

Programming	Python, C, MATLAB
Web / Backend	Flask, API integration, basic routing and request handling
Database	SQLite database connection, storing questions, chat history, and unknown queries
Tools	MS Excel, GitHub, VS Code, Jupyter Notebook
Core Concepts	OOP basics, data structures basics, operating system fundamentals, problem solving
Soft Skills	Quick learning, communication, time management, self-learning mindset

PROJECTS

CareerMate AI - AI Career Guidance Chatbot | Python, Flask, Gemini API, SQLite

- Developed an AI-powered chatbot to guide students in internships, resume improvement, skill roadmaps, interview practice, project ideas, programming doubts, and study planning.
- Built Flask backend logic to receive user questions, check stored database answers first, and generate AI responses using Gemini API when no database answer is found.
- Implemented SQLite storage for predefined answers, unknown questions, and chat history to improve the chatbot over time.
- Added category-based interaction flow to make responses more focused for career guidance and student preparation.

HANDS-ON PRACTICE

- Python:** Practiced functions, loops, conditionals, file basics, classes, objects, and beginner OOP concepts.
- C Programming:** Practiced arrays, strings, pointers, structures, and basic problem-solving programs.
- Excel:** Created gradebook trackers and payroll sheets using formulas, sorting, and clean tabular formatting.
- GitHub:** Maintaining repositories to track coding progress, upload projects, and build a developer workflow.
